Canon Latin America, Inc., a leader in digital imaging, today announced the introduction of its new photo printer the PIXMA MG5310 Wireless Photo All-In-One developed to enhance the overall user experience.

An incentive for those who have registered with Picasa Web Albums is PIXMA Cloud Link, which provides the ability to print, directly through the PIXMA MG5310 printer without the use of a computer, photos from photo albums stored in those services. Users of PIXMA Cloud Link will also have access to exclusive templates including stationary, envelopes, memos, calendars and many others. In addition, the MG5310 printer is 802.11n Wi-Fi certified allowing for a fast network transfer rate. Canon Latin America offers customer services and online support for all its consumers looking to set up any of the new Wi-Fi products.

The Canon EPP mobile app, for use with compatible Apple smartphones and tablets, will be upgraded in August to have documents scanned on the printer to then be sent directly to a compatible device. Users can also print PDF documents that were created with the App directly from compatible devices whereas in the past only photos were able to be printed

For the consumer interested in a high-quality multifunction printer which is easy to use and affordable, the Canon PIXMA MG5310 Wireless Photo All-In-One Printer should be at the top of the list. This printer features five individual ink tanks which are part of the ChromaLife100+ ink system and help to produce a 4" x 6" (10 x 15 cm) borderless photo in approximately 20 seconds.

In addition, the printer has a maximum color resolution of 9600 x 2400 dpi. This new PIXMA All-In-One printer will deliver output at approximately 12.5 ipm for black-and-white documents and approximately 9.3 ipm for color. The Advanced Media Handling options such as Auto Duplex printing which helps conserve your paper supply and a two-way paper feed that can help reduce the amount of time it takes to complete a project. The size of the LCD screen has been increased to 3.0-inches and repositioned toward the middle for easy viewing and navigation through menus.

Full HD Movie Print has been enhanced to produce clearer images of frames from videos captured on compatible HD Canon EOS and PowerShot Digital Cameras. One new aspect is the ability to merge multiple images into one final shot so users will be able to capture nearly every portion of a golfer's swing or a baby's first steps. In addition, a new layout feature allows printing up to 72 individual images on one sheet.

The Canon Easy-PhotoPrint EX software has provided users with an easy way to get the most out of prints by creating albums, calendars and tags from almost any image. Now with the latest version, users can bring creativity to a whole new level with the addition of Fun Filter Effects similar to scene modes found on the latest Canon PowerShot Digital Cameras. Images can be customized with Fish-Eye, Miniature and Toy Camera effects to make them even more memorable while being a conversation piece at the same time.
