This stylish and compact All-In-One printer is ideal for students and families looking for a simple solution that is easy to set-up and use at an affordable price.

The new Canon PIXMA MG2110 Photo AIO printer provides consumers with the ability to print, copy and scan high-quality documents. It also delivers output at approximately 8.4 ipm for black-and-white documents and approximately 4.8 ipm for color and can create a 4" x 6" borderless photo of superb quality in approximately 44 seconds.

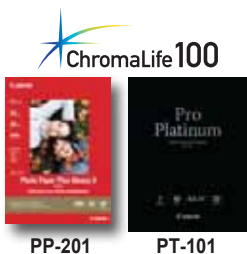

This printer is more compact than previous models thanks to the new FastFront design, which allows the paper and ink cartridges to be loaded from the front. Additionally, this new printer uses Canon's FINE ink cartridges, which feature a new ink formula for improved color reproduction on plain paper. For everyday users, these printers have available optional high yield black XXL-size and XL-size black and color ink cartridges. The FINE print head technology with a minimum 2pl color droplet size, combined with maximum 4800 x 1200 dpi color print resolution, produces beautiful photo prints.

This Photo All-In-One Printer combines exceptional value with significant upgrades to Easy-PhotoPrint EX and Full HD Movie Print software and offers access to outstanding features including Easy-WebPrint EX for intelligent web printing.

With the latest version of Canon Easy-PhotoPrint EX, users can bring creativity to a whole new level with the addition of Fun Filter Effects similar to scene modes found on the latest Canon PowerShot Digital Cameras. Images can be customized with Fish-Eye, Miniature, Toy Camera, Soft Focus and Blur Background effects to make them even more memorable.

Full HD Movie Print has been enhanced to produce clearer images of frames from videos captured on compatible HD Canon EOS and PowerShot Digital Cameras.

Designed to print documents, web content and photos quickly and easily, this affordable PIXMA printer provides the Canon image quality signature for consumers who do not want to miss out on the latest Canon innovations while using their printer efficiently.
